Search Strategy

Creation of this bibliography started with a search string in Web of Science to retrieve articles with titles focused on major food justice themes such as food entitlements, food deserts, and nutritional disparities:

**TITLE: ((food OR nutrition*) AND (justice OR secur* OR equality OR insecure* OR disparit* OR stamps OR entitle* OR desert*))**

The search string pulled ~5K results. Web of Science “Highly Cited” articles are included in the bibliography. These are articles that are cited a very high number of times relative to how long they have been in publication in their journal subject categories. Articles dealing with food security in relation to climate change are excluded from this bibliography.
